

**HAZARDOUS WASTE DISPOSAL**  
**Photochemical Waste**

Disposal of untreated photochemical waste into municipal sewers or landfill is prohibited by *BC Hazardous Waste Regulations, 2004*. Photochemical waste is classified as a corrosive and may contain levels of silver in excess of *BC Hazardous Waste Regulations, 2004*.

- Collect photochemical waste in an approved container
- Separate FIXER waste from DEVELOPER waste.
- Cap/seal container prior to pickup. Store materials in an appropriate location for the contents.
- Fill out the Chemical Materials Disposal tag. Contents should be described in percent, in full English (no abbreviations), totalling 100%
- Register your waste as “Chemical Waste” through the Hazardous Waste Inventory System (HWIS) at <https://cwis.rms.ubc.ca/wisoc/login.aspx>

Prior to pick up please ensure:

- exterior of container is not contaminated
- container is sealed/capped
- label is affixed and complete
