

**HAZARDOUS WASTE DISPOSAL**  
**Used Oil Waste**

Disposal of used oil waste into municipal sewers or landfill is prohibited by BC Hazardous Waste Regulations, 2004. Used oil includes:

Automotive oil	Hydraulic oil	Emulsion
Cutting oil	Refined petroleum based oil	Crude oil
Fuel oil	Synthetic oil	Vacuum pump oil
Gear oil		

- Collect used oil in the original supplier container, a glass container or containers supplied by HSE.
- **It is preferable to collect oil in original containers.**
- Do not mix different oils together
- Do not include grit, glass, plastics, paper, sludge or other chemicals
- Cap/seal container prior to pickup. Store materials in an appropriate location for the contents.
- Fill out the Hazardous Materials Disposal tag if not in the original container. Oils returned to the original container do not need a waste tag.
- Register your waste as a “Chemical Waste” through the Hazardous Waste Inventory System (HWIS) at

Prior to pick up please ensure:

- exterior of container is not contaminated
- container is sealed/capped
